Chad Koslovsky

Understand the system. Own the recovery.

Milliken, Colorado · chad@koslovsky.xyz

Senior Systems Administrator | Quoris

View my interactive resume and work: https://quoris.koslovsky.xyz

01 PROFILE

My background combines hands-on hosting and managed-services work with ownership of client systems. I connect access, servers, cloud services and recovery with the people waiting for the system to work.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | Present

Own client infrastructure, applications, access and direct support, carrying problems through investigation and recovery.

Modernized Excell Services' servers and endpoints with Windows Server, Active Directory, VPN access and satellite-location support.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Ran the NOC and engineering escalations for hosting, server and colocation customers; built tooling for operations teams.

Worked across Windows/Linux, Hyper-V, ESXi, Docker and recovery; later held sole systems-engineering responsibility for about a year.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered and supported business networks, systems and endpoints in a managed-services environment.

Handled monitoring, on-call troubleshooting and recovery, built diagnostic tools and delivered antivirus services.

Infrastructure and Systems Focal · IBM | 2010-2012

Operated shared enterprise infrastructure and coordinated changes, incidents and escalations across application, infrastructure and vendor teams.

Automated audit and backup workflows and managed virtualization test labs and hosted desktop platforms.

03 SELECTED WORK

Excell Services | Server and access modernization · Technomancy IT client, Wray, Colorado

Modernized legacy servers, employee computers and networks with Windows Server, Active Directory and VPN access.

Helped bring a satellite location online, connecting hands-on system changes with day-to-day client support.

Technomancy platform | Operational context and recovery · Own practice and client-operations product

Connected support, customer records, billing and infrastructure telemetry through tenant-aware services.

Release tooling records deployment identity and health; separate tooling verifies checksums and restores PostgreSQL backups.

04 CAPABILITIES

Windows Server / Linux / Active Directory / PowerShell and Bash · Hyper-V / VMware ESXi / Docker / AWS and Azure client environments · Backup / restore verification / monitoring / incident escalation · DNS / VPN / endpoint protection / operational documentation
